

COVIDSafe App

For information about how this app works and any privacy implications check out:

<https://www.health.gov.au/resources/apps-and-tools/covidsafe-app>

Downloading the app

- Follow instructions on previous guide **Downloading an App**. It can be found [here](#)

Installing COVIDsafe

- Once you have downloaded the app you must set it up and register for it to work. It's a fairly simple process of just moving from screen to screen.

- You should see this screen first
Press **I want to help**

Press **Next**

Registration consent

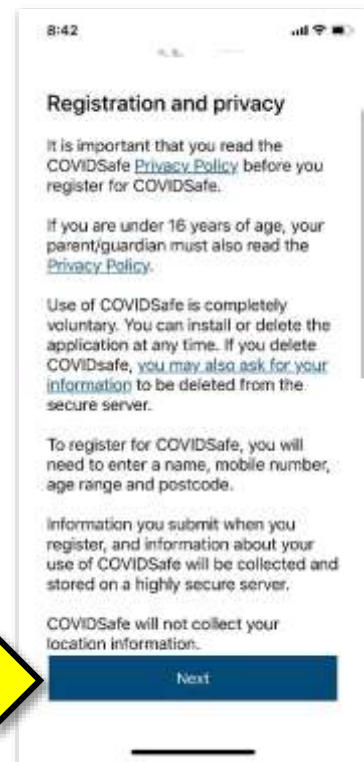

I consent to the Australian Department of Health collecting:

- My registration information to allow contact tracing by State and Territory Health officials.
- My contact information from other COVIDSafe users after they test positive for COVID-19.

I consent.

I agree

Select **I consent** and then press **I agree**

Registration and privacy

It is important that you read the COVIDSafe [Privacy Policy](#) before you register for COVIDSafe.

If you are under 16 years of age, your parent/guardian must also read the [Privacy Policy](#).

Use of COVIDSafe is completely voluntary. You can install or delete the application at any time. If you delete COVIDSafe, you may also ask for your information to be deleted from the secure server.

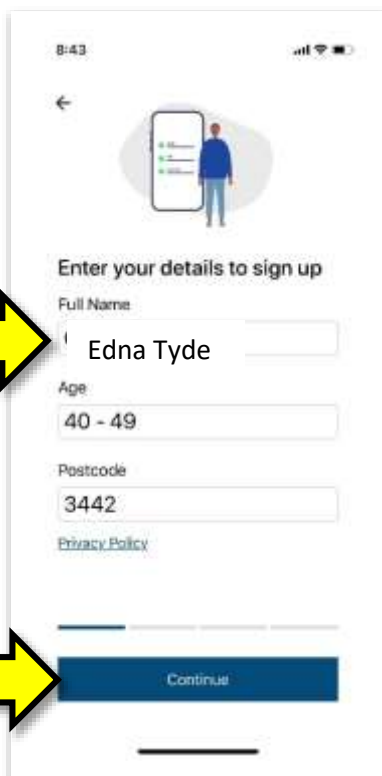

To register for COVIDSafe, you will need to enter a name, mobile number, age range and postcode.

Information you submit when you register, and information about your use of COVIDSafe will be collected and stored on a highly secure server.

COVIDSafe will not collect your location information.
